PROFESSIONAL SUMMARY

Third-year Computer Science student at Modern Academy (graduating 2028) with practical training in networking, IT, and cybersecurity. Completed CCNA labs in Cisco Packet Tracer (routing, switching, VLANs, STP, OSPF) and practiced Nmap, Wireshark, and Burp Suite in authorized labs. Built a Node.js security project with login, access control, rate limiting, and logging. Training includes Google courses on Coursera. Looking for an IT, network, or junior cybersecurity internship.

EDUCATION

Bachelor's Degree in Computer Science, Faculty of Computers and Information, Modern Academy
Expected Graduation: 2028 | Currently in third year

TECHNICAL SKILLS

Networking: CCNA, Routing, Switching, VLANs, STP, OSPF, Network Troubleshooting, Traffic Analysis, Cisco Packet Tracer

Cybersecurity: Vulnerability Identification, OWASP Top 10, Security Fundamentals, Access Control, Risk Management, Incident Response (basics), Security Logging

Security Tools: Nmap, Wireshark, Burp Suite, Kali Linux

IT and Systems: Linux, VMware, Virtual Machines, Troubleshooting, Git, GitHub

Programming: Python, JavaScript, C++, HTML, CSS

PROJECTS

CCNA Network Design Lab | Training Project, Cisco Packet Tracer | linkedin.com/in/arafa-mohamed-8015a3374
- Designed, configured, and tested a small network in Cisco Packet Tracer during CCNA training.
- Configured routing, switching, and VLAN segmentation.

Networking and Security Labs | Hands-on Practice | github.com/Arafa403
- Practiced VLANs, STP, OSPF, routing, and switching in simulated networks.
- Used Wireshark and Nmap for traffic analysis and scanning in authorized labs.

SecureWeb Lab | Personal Project, In Progress | github.com/Arafa403/SecureWeb-Lab
- Built a local web security practice app with Node.js, Express, and SQLite.
- Added login (authentication), role-based access control (RBAC), and rate limiting.
- Added security event logging and WAF-style detection and blocking.
- Used Helmet to set secure HTTP headers.

Vulnerability Assessment Practice | Cybersecurity Training, Authorized Labs
- Studied common web and network vulnerabilities (OWASP Top 10) and how to find them in authorized labs.
- Practiced vulnerability testing with Burp Suite and Nmap in controlled environments.

TRAINING AND COURSES

- **Cisco CCNA Training:** routing, switching, VLANs, STP, OSPF, network troubleshooting
- **Cybersecurity Training:** vulnerability identification, OWASP Top 10, authorized lab practice
- **Google Courses on Coursera:** cybersecurity and IT fundamentals
